Melvin Gode

EDUCATION

2024 - 2025
ENS Paris-Saclay

- Master's year two : Mathematics, Vision, Learning

2022 - 2024
Paris Dauphine University

- Master's year one : Decision-Support IT and Mathematics
  - Recipient of the PSL excellence fellowship
  - Semester abroad at **Uppsala University**, Sweden : Perfect grades
  - Graduated with high honors
  - Valedictorian

- Bachelor : Computer Science and Mathematics for Decision
  - Graduated with highest honor
  - Valedictorian

2020 - 2022
University of Paris

- Associate degree in Statistics and Computer Science

INTERESTS

- **Sports**

Swimming, Climbing, ran a Marathon

- **Language Learning**

Swedish, Italian, German

- **Reading**

The Selfish Gene, The Black Swan, Superintelligence, Moneyball...

- **Video Games**

The Witness, Celeste, Superliminal...

- **Cooking**
- **HitchHiking**

NATURAL LANGUAGES

- French - Native
- English - Fluent
- Swedish - Conversational
- Italian - Conversational
- German - Beginner

EXPERIENCE

PhD at KTH

OCTOBER 2026 - Now

Digitizing the sense of smell: Representation Learning, Neuroscience and Chemistry. Supervised by Danica Kragic at RPL.

Master's Internship at Nokia Bell Labs

APRIL - OCTOBER 2025

Contrastive Learning for Knowledge Graph embedding

Research Internship at LAMSADE with Tristan Cazenave

JULY 2024

Monte Carlo Tree Search for epistemic reasoning.

Internship at CNP Assurances

APRIL - JUNE 2022

Missing data estimation, automated data exportation.

Data Visualization through interactive dashboard.

SELECTED PROJECTS

Linktree, Github

- **Network community detection on Wikipedia**

Applied various clustering methods to a subgraph of Wikipedia.
Interpretable and visualize-able results.
Congratulated by the original paper's author.

- **Interpretable Time Series Classification**

Based on symbolization and extracting discriminative subsequences.
Re-implemented the full paper and applied it to motion tracking data.

- **Comparative Analysis Of Reinforcement Learning And Genetic Algorithms**

Comparing the difference in behavior of RL and GA on a shared benchmark task. Report grade : 5/5.

- **Solving The Knapsack Problem Using Dynamic Programming and Branch & Bound**

Exploring techniques to solve NP-hard problems fast.
Developed a heuristic bringing a > x70 speedup on Branch and Bound.

SKILLS

- **Deep Learning :** Time Series, GNNs, RL, Computer Vision
- **Modeling :** Graph Theory, Game Theory, LP and MIP
- **GOFAI :** Logic Theory, Symbolic AI, Genetic & Search Algorithms
- **Math :** Optimization & Numerical Methods
- **Stats :** Statistical Modeling, Inference and Tests
- **Languages :** Python, Java, JavaScript, R, SQL, Prolog, LaTeX
- **Libraries :** PyTorch, Networkx, Matplotlib, Numpy
